

# Rebuilding Essential Health Services

## Pre-Conflict Degraded Services

- Child 125/1000
- Maternal Mortality 294/100,000
- 20% chronic malnutrition
- Poor breastfeeding practices
- Doctors outdated knowledge and too few nurses
- Facilities not maintained

## Post-Conflict Provided Critical Health Services

- 3 million ORS packets, 1.4 million vaccines for women and children
- ID Surveillance system established
- 325 metric tons of High Protein biscuits distributed
- Clinic staff trained
- National health facility assessment
- WHO kits distributed

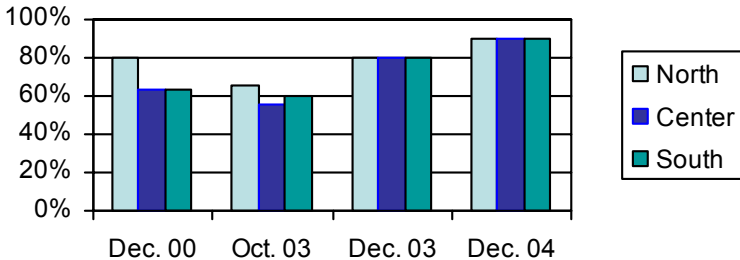

## October 2003 Restoring Basic Health Services

- 60% of children immunized
- Child nutrition centers reestablished
- First national nursing conference held
- MOH reestablished
- National health strategy developed
- Hospitals and clinics to pre-war level

## Through 2004 Strengthen and Reform System

- Maternal child health framework implemented to reduce child mortality
- 8000 nutrition staff trained
- 740 clinics equipped
- MOH decentralized prevention and community based strategy established
- Human resource capacity development

Iraq – Immunization Rates

Iraq – Under-Five Mortality Rates
